

# Apps that will help in school and on tests.

People are not robots, and the disciples too. So everyone, even the student, there are problems (albeit small) with certain items. But, there comes a time when you need to write a test or independent work and the student understands that he knows nothing. What to do below such situations do not happen? Regularly discarded? No, it's not an option. There is another, more effective method to download a special app that will help in the study of individual subjects.

## 1. Chemistry

Most high school students have problem with chemistry. It is understandable, because it is a complex science that should be taught and understand. But what if you do not want to teach, but to understand does not work? For such cases, the application is simple and banal name "Chemistry". It has everything from the periodic table and decomposition to complex ion reactions. This app will help not only for the control and laboratory works on chemistry, but also in homework assignments. It is enough to drive the search for the necessary response and the user will receive the correct answer to the task.

## 2. English – Russian Offline dictionary

At the English lesson always need a dictionary, the only question is how: paper or electronic? Undoubtedly, the paper dictionary has a number of advantages, but, according to most students, electronic is better. English – Russian Offline dictionary – one of the best electronic dictionaries. How is it so good? Firstly this app can be used without Internet. Second, clicking on the desired word, the user can hear the pronunciation of this word (correct, with a good accent). Learn English with this app is a pleasure, and the teachers won't pick on your pronunciation.

## 3. Biology – the entire school year

Biology is another subject which can cause problems. Remember all sections of biology (botany and Zoology, and anatomy) is very difficult, but in high school this knowledge is necessary. What should I do? In this case, a good helper is an application of "Biology – the entire school year". This is really the best app to learn biology, because they have all the notes and all important information on all topics.

## 4. Physics formula reference

Few students really know and understand the physics (especially in high school). In fact, it's really very complex subject where you need to learn a lot of information. On the control and independent works necessarily need a formula, but not all of them teach. What to [need someone to write my essay](#) do in such situations (especially when there is nobody to write off and Internet is not working)? In such cases, a great help the app "Physics formula reference". There is not only all the formulas, which can be caught on a test, but all the necessary material. With this application the student will always be good to go physics.

## 5. LibriVox

Literature is an important subject that students are driven in the same way as in mathematics. Sometimes, you absolutely do not have time to read a big book (or simply very well, not much like the text). What to do, because the lesson will ask? To read a shortened version? It does not always help. The best option is to listen to the audiobook. It is much faster than reading, but still interesting. Thus, the lesson of literature the student will not receive a deuce, and a very good answer.

All these applications (and many others) will help in studying and on tests. But best of all, of course, not to cheat, and know the material.
